

# Eliminate paper EOB and correspondence bottlenecks

## REMITMAX™ BY QUADAX

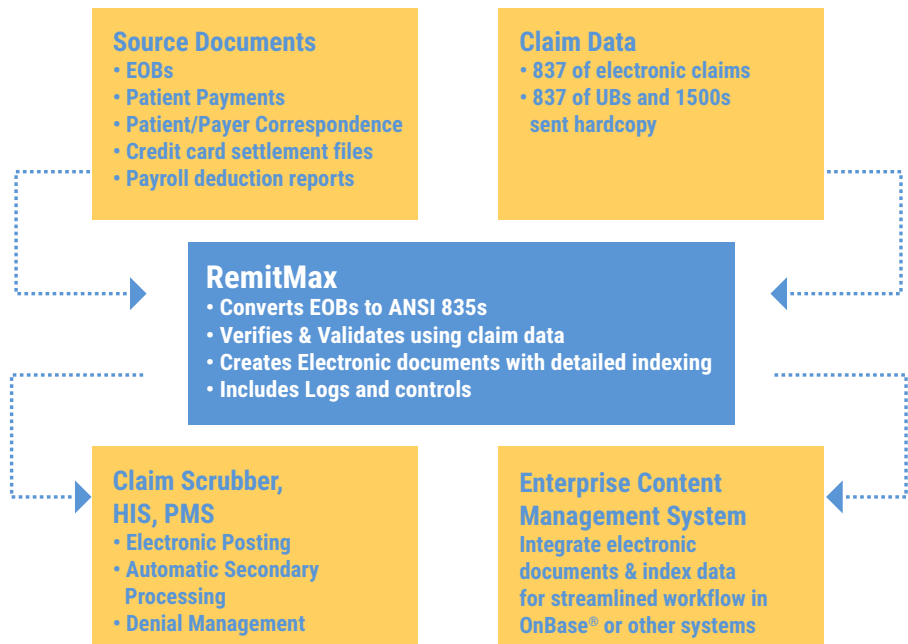

RemitMax streamlines your billing office workflow and saves those hard-earned dollars by eliminating paper. According to a 2016 study by the CAQH Index,<sup>®</sup> switching to electronic processing of Remittance Advice documents can save 83% over manual processing.

Are your operations bogged down by:

- Management of paper documents such as EOBs, patient payments and correspondence?
- Time-consuming manual posting of payments and adjustments?
- Difficulty finding documents in filing cabinets, hard drives, or inefficient applications?
- Lack of denial information from paper EOBs for denial management and follow-up?
- Tedious scanning and indexing of documents?
- Poor implementation from companies that do not understand the healthcare revenue cycle?

If so, you know that handling paper remittance documents is not only inconvenient, it's costly! Hidden costs such as mailroom processing, filing, storage, retrieval, and manual posting have a significant effect on your bottom line.

Adding RemitMax to your remittance management strategy allows you to get control of all of your remittance and correspondence documents—even patient payments—that you or your lockbox now receive on paper.

RemitMax, your first choice in remit management

- Provides significant labor savings for posting, indexing, and insurance follow-up
- Eliminates the cost and space needed for paper handling and filing
- Increases posting accuracy and consistency
- Enhances and completes denial reporting with Standard ANSI denial codes for better follow-up

\*2018 Best in KLAS: Software and Services report

At Quadax, neither our software nor our business model is rigid.
